DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 18-21, 24, and 27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 18 recites the limitation "**A computer readable storage medium encoded with a computer program for causing a computer to perform the steps of...**". However, the specification does not disclose a computer readable storage medium encoded with a computer program for causing a computer to function. At most the specification discloses a recording medium or a computer program (see page 12, lines 2-8 of the instant specification) but does not disclose a correlation between the medium and the program, or the medium comprising the program to cause computer functions.

Allowable Subject Matter

3. Claims 2-5, 8, 10-13, 16, 25, and 26 are allowable over prior art references.
